

OPEN CALLS

SUPPORTING DIGITIZATION IN EUROPE IN CUSTOMIZED LOW-ENERGY COMPUTING

You are an industrial or academic player active in digital innovations and you want to:

- **Upgrade** products and services
- **Improve** production and work processes
- **Find innovative solutions** for current challenges
- **Adapt** your business model to the digital era

in at least one of the following ICT domains:

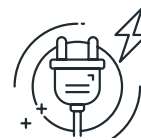

Cyber-physical systems

Internet of Things

Industry 4.0

Customized low-energy computing

Take a look at the TETRAMAX open calls! tetramax.eu/calls

TETRAMAX offers **technical** and **financial support** for collaborative and international technology transfer experiments:

- Access to advanced digital technologies and competences
- Financial support per experiment ranging typically from € 20,000 to € 70,000
- Short time to market: Short-term experiments (6-18 months)
- Short time to contract: Quick funding decision (typically 7 weeks)
- Free provision of technical and business coaching services

How it works

A technology transfer project idea is submitted in the form of an abstract (in English): Technical development and adaptation of new and innovative digital products, processes or services related to the ICT topics above.

Tech transfer proposals are externally reviewed and ranked in accordance with selection criteria such as concept and technology, consortium, business model and expected impact.

The highest ranked proposals will receive TETRAMAX project grants.

Submitting a technology transfer project idea

Proposals are externally reviewed and ranked

Selected proposals participate in project grants
